Update Key.db via Network

Due to share links is more easy than share files,
we add easy way to update keys in receivers.

**Put your up to date key.db file on any server
and just share link to it with others !!!**

1. Go to *System Setup → TV System* → and press [green] *Update*

2. Choose **Manual** → now you can type in your own http path
   to your key.db file. For example:

3. After press „update" receiver will download & update all keys.

Note: You can always restore previous version in case if new key failed.
